

The versatile 6 cubic metre sweeper

**CityFant 60**

**Manoeuvrable and versatile**

## Lower costs, higher comfort

Bucher Schörling sets high standards for the quality and durability of its sweepers. These same high standards are also applied to driving comfort. Ergonomically designed control elements, easy handling and accessibility of all units for maintenance purposes help to ensure focused work, even during long hours of operation.

## High performance and efficiency

Bucher Schörling's CityFant 60 sets standards in efficient street sweeping. With a hopper capacity of 6 cubic metres, it is perfectly suited for working on industrial sites and large traffic surfaces. As a standard, the CityFant 60 is equipped with a water tank for 1 500 litres of fresh water (up to 1 700 litres – optional). Long operating hours on extremely dirty roads are therefore managed without difficulty. The full range of useful options considerably increases the CityFant 60's versatility:

a swivel main brush and an additional sweeping device for left and right-hand operation, and an optional quick-change system for winter service all contribute impressively to this sweeper's versatility, making it an extremely economical all-rounder.

**Powerful wash-down system**

60-bar high-pressure system featuring a 1 500 mm stainless-steel spray bar with 8 flat jets mounted on the main broom. Achieves optimal, low-dust cleaning with minimum water consumption. (Option)

**Ingenious sweeping device**

Forward and rear movement of the gutter broom is controlled pneumatically. The fully extended sweeping device is clearly visible to the driver at all times.

**Weed brush**

Weed brush with extremely effective gutter broom designed to cope with difficult applications. Telescopic gutter broom including an adjustment to vary load-bearing pressure, inclination and rotating speed. (Option)

**Suction wander hose**

The suction wander hose for cleaning catch basins and for suction behind crash barriers and other awkward places, can be swivelled 180 degrees. (Option)

## Future-oriented technology with the customer in mind

With many years of experience in sweeper manufacture, Bucher Schörling's engineers and technicians are committed to developing perfect solutions for specific requirements. In close consultation with field experts, new and special applications in city cleaning are addressed and economical improvement concepts developed and applied. As varying tasks may require special carrier vehicle specifications, the CityFant 60 can be mounted on the actual chassis of most manufacturers.

As well as complying with all existent environmental regulations, product improvements already made to the CityFant 60 also take into consideration future noise and exhaust requirements

### Suction wand hose extension with remote control

The suction wand hose extension with remote control: electro-pneumatic lifting and lowering and remote control allow for significantly easier operation. (Option)

### Suction-fan unit

The Cityfant 60's central component is the suction-fan unit with a Mercedes Benz auxiliary engine, model OM 904 LA (picture) or Iveco NEF 45 NMS. Full or semi-hydrostatic drives are optional.

### Airguide screen

The airguide screen can be tilted pneumatically for easy hopper cleaning and maintenance. All units in the suction area are easily accessible.

### Practical Hopper

The distortion resistant, extremely stable hopper has a capacity of 6 cubic metre. The hopper bottom is made of chrome-alloyed steel.

## The versatile 6 cubic metre sweeper

Cities, municipalities and private companies, everywhere everyone benefits from the versatility of Bucher Schörling's 6 cubic metre CityFant 60.

Call us for a demonstration! Let us show you the range of vehicle configurations available to respond to your particular requirements.

**Control panel**

The newly designed, ergonomic control panel provides a high level of driver comfort through sensibly grouped, non-reflective gauges and easily understandable pictograms.

**Camera**

Equipped with a wide-angle lens and a high-contrast display, ensuring excellent overall view when sweeping in narrow alleys or when reversing. (Option)

**Optional fuel tank**

The 130-litre additional fuel tank considerably increases the radius of travel and work.

**Solid body construction**

The body frame is a solid construction with galvanized individual parts for the best possible corrosion control. The maintenance platform is made of stainless steel as a standard.

**Professional service** Bucher Schörling's worldwide success is based on its extensive distribution network with qualified advisors and a focus on customer needs. At Bucher Schörling, service begins at the drawing board when we design vehicles tailored to accommodate our customers' requirements to produce bespoke solutions. We are renowned for our sound, competent advice and reliable service. This is assured by knowledgeable and well-trained staff coupled with efficient distribution centres offering always the fastest delivery of original spare parts, a fleet of mobile service vehicles and long-term supply guarantees.

**Certified quality – economic operation** Committed to quality, Bucher Schörling strives to ensure continuous machine uptime, long life and low maintenance. Our competence centres are fully ISO 9001:2000 certified, providing vehicles that deliver the best value for money with the lowest total cost of ownership.
